

Toro GDC Twist

Conductor construction is soft drawn bare copper meeting the requirements of ASTM Specification B-3. Gauge sizes 14 thru 10 are solid conductors.

The insulation is high density polyethylene, twisted for systems applications of up to 600 volts. UV inhibitors added for color stability.

Application: Suitable for use as power and control wire of irrigation systems.

Conductor: Soft drawn bare copper (ASTM Spec. B-3), Solid (14 awg and 12 awg).

Insulation: Polyethylene (HDPE)

Temperature: 75° C

Voltage: 600 volts

Conductor Size
14 awg and 12 awg

Insulation Thickness
.075

RoHS
Compliant
